

# Modified Simple As Possible Computer (MSAP)

According to my Student ID (180205126), My assigned group is 'H' . Point to be noted that I took 'MOV C,BE' in 6<sup>th</sup> line instruction instead of the given one to avoid any overlapping issue during the simulation.

For the final output 37 :-

As this is total 11 line instruction(code), so 'Program Counter' is showing 'B (1011)'.
